Approach

Senior Product Designer connecting user needs, business goals and technical possibilities to create meaningful product experiences.

I take a strategic, research-driven approach, with a focus on accessibility and the bigger picture.

I believe the best solutions emerge when we share a vision, challenge ideas and bring different perspectives together - while having fun on the way.

- Product discovery & strategic thinking
- User research & usability testing
- Data-informed design & experimentation
- End-to-end product design
- Interaction & UI design
- Art direction
- AI-assisted design & prototyping
- Accessibility & inclusive design
- Cross-functional collaboration & facilitation

Tools

`Design & prototyping`

Figma · Figma Make · Claude Design/Code · Affinity

`Research & insights`

Dovetail · Maze · Pendo

`Collaboration`

Miro · FigJam · Confluence

`Technical`

HTML/CSS

Experience

Senior Product Designer

`2016 - 2026` · Siteimprove

- Designed and evolved B2B SaaS solutions that expanded digital accessibility capabilities across websites, mobile apps, PDFs, design files and code.
- Used customer research and journey mapping to shape product priorities and address user needs.
- Explored early proactive and conversational AI patterns for accessibility remediation, informing emerging product experiences.
- Introduced journey-mapping templates adopted across the design team and facilitated workshops to align teams around user needs.
